

Furst-Class[®] CONCENTRATE

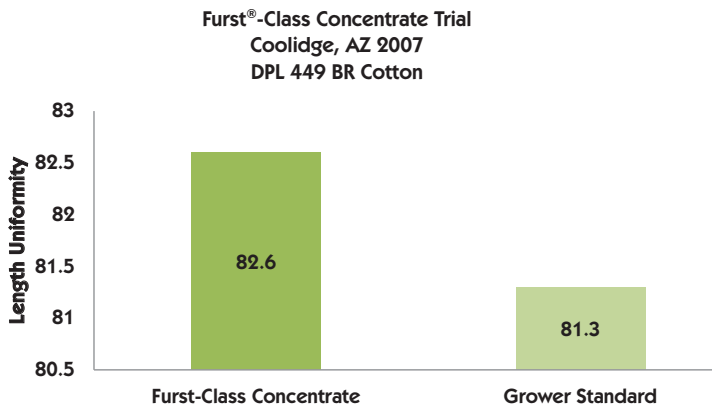

NUTRIENT-UP TAKE ENHANCER

Location: Coolidge, AZ
 Crop: Upland Cotton
 Variety: DPL 449 BR

Furst-Class Concentrate Drives Results

Furst[®]-Class Concentrate from Fertizona is a patented combination of amino acids and proteins which activate several beneficial biological and environmental responses in plants. This proprietary nutritional technology is formulated into foliar and drip irrigation fertilizers as an ingredient to increase fertilizer efficiency, yield potential, plant health and quality of fiber. The following provides general guidance on formulation and use rate for upland cotton, however programs can be customized as needed to best fit crop nutritional needs.

COLOR GRADING

Furst Liquid: 31-2
Premium White Middling

Grower Standard: 41-2
Base White Strict Low Middling

Furst-Class Concentrate stimulates and enhances overlapping physiological mechanisms. The product employs specific low-molecular weight carbon-containing metabolites both to stimulate metabolic activity within the plant cell and to elicit and maintain the plant's beneficial systemic acquired resistance (SAR) response. It is the qualitative biological actions, and the sequence of physiological events initiated by these signaling compounds present within Furst-Class Concentrate, that define the product's performance.

FIVE APPLICATIONS

- FIRST BLOOM** 4 floz Furst Liquid/acre
- WEEKLY** 4 floz Furst Liquid/acre
Every 10 days for four applications after initial application

Furst-Class Concentrate was applied with the grower's existing nutrient program.
