

## Furst-Class Concentrate Drives Results

Furst®-Class Concentrate from Fertizona is a patented combination of amino acids and proteins which activate several beneficial biological and environmental responses in plants. This proprietary nutritional technology is formulated into foliar and drip irrigation fertilizers as an ingredient to increase fertilizer efficiency, yield potential, plant health and quality of produce. The following provides general guidance on formulation and use rate for fresh market tomatoes, however programs can be customized as needed to best fit crop nutritional needs.

## FRESH MARKET TOMATOES

- Increased Tomato Yield
- Increase in Brix
- Improved Size Uniformity
- Improved Color
- Increase in Marketable Fruit
- Decrease in Culls

### DRIP SIX APPLICATIONS

- FIRST BLOOM** 4 floz Furst Liquid/acre
- WEEKLY** 4 floz Furst Liquid/acre  
Every 7 days for five weeks after the initial application

Furst-Class Concentrate was applied with the grower's existing nutrient program.

### FOLIAR TWO APPLICATIONS

- FIRST BLOOM** 16 floz Furst Liquid/acre
- FRUIT SET** 16 floz Furst Liquid/acre

Furst-Class Concentrate was applied with the grower's existing nutrient program.
