

7.5-26-0 8S

N-pHuric and Phosphoric Acid Blend

Benefits of use:

- Sulfuric and phosphoric combination, which neutralizes the “tying up” effect of phosphate introduced into hard water.
- Clean product, which will not allow for the formation of calcium precipitation in the irrigation water.
- Stable formulation of nitrogen and phosphorus in an acidic state.

7.5-26-0 8S provides an excellent source of nitrogen and phosphorus for warm and cool season turf. An ideal choice for a starter fertilizer following the overseeding process or for the use of establishing new turf.

Nitrogen is the greatest factor in turf growth. Absorbed primarily as nitrate or ammonium, **nitrogen** promotes rapid growth while improving turf's ability to withstand stress and heavy traffic. **Phosphorus** is utilized in the formation of nucleic acids, the storage and transfer of energy, while also increasing seedling vigor and root development.

Prior to mixing 7.5-26-0 8S with other micronutrients, a jar test is recommended to test for compatibility. This product should not be mixed with **calcium** or neutral (pH≈7.0) materials.

Guaranteed Analysis:

Total Nitrogen (N)	7.5%
Urea Nitrogen	7.5%
Available Phosphorus (P ₂ O ₅)	26.0%
Total Sulfur (S)	8.0%

Weight per gallon:

13.40 lbs.

Each gallon of 7.5-26-0 8S supplies 1.01 lbs. of N 3.48 lbs. of P₂O₅ and 1.07 lbs. S

Recommended application rates:

¼ lb. N/1000 ft ²	10.78 gallons/acre
½ lb. N/1000 ft ²	21.56 gallons/acre
1.0 lb. N/1000 ft ²	43.13 gallons/acre
¼ lb. P/1000 ft ²	3.13 gallons/acre
½ lb. P/1000 ft ²	6.25 gallons/acre
1.0 lb. P/1000 ft ²	12.51 gallons/acre

Fertizona makes no claims beyond suggested amounts. These rates are only suggestions and should only be used as guidelines.
