

ENDURANT[®]

TURF COLORANT

MAKE A LASTING IMPRESSION[™]

PRODUCT DESCRIPTION

Endurant Turf Colorant is for use over a wide variety of areas including, but not limited to: Golf course greens, tees, fairways and roughs, athletic fields, parks, home lawns, common areas and medians. **Endurant Turf Colorant** is an Eco-friendly, organic-based pigment made with binders specifically chosen for Turfgrass adhesion. This technology ensures the color remains full and rich, fades on tone, and provides a natural-looking green that is consistent with healthy turf. Its long lasting, realistic visual appeal is unmatched by any other brand on the market. One gallon of **Endurant Turf Colorant** mixed with water will cover approximately 5000 sq. ft. of turf. The area and rates covered will vary dependent upon factors including turf condition, equipment calibration, depth of desired color, and amount of green leaf tissue available due to approaching or existing dormancy.

RECOMMENDED RATES

The most commonly used rates for golf greens is 8 oz. per gallon of water. For tees, fairways, roughs, and common areas, 14-16 oz. per gallon of water is recommended. Consulting with your sales/technical representative is strongly recommended for suggested rates as each course faces different variables.

MIX WELL BEFORE USE.

DIRECTIONS FOR USE

Contents may settle: Shake or agitate well before mixing. It is recommended that prior to applying **Endurant Turf Colorant**, cut turf to desired height. Blow surface free of debris including clippings, leaves, and worm castings. Nozzle types, pressure, spray angle, and water carrier volume will all affect proper product distribution. Avoid overspray on areas such as curbing, concrete, tee markers, or other objects where color is not desired. Accidental overspray may be decreased with a water/soap mix and scrub brush immediately.

EQUIPMENT NOTICE

Geponics recommends the use of alternative seals to aid in the prevention of leaks when using centrifugal pump designs that have ceramic seal kits. Standard ceramic seal kits may leak during long applications. Please consult with your sales/technical representative for simple replacement recommendations.

Rinse spray tank, screens, and soak nozzles thoroughly after using any colorant.

Endurant Turf Colorant is a tank mix compatible with numerous pesticides, herbicides, fungicides and fertilizers. Performing a standard compatibility jar test is strongly recommended for any tank mixtures. DO NOT combine any other products containing additional pigments to **Endurant Turf Colorant** as a negative discoloration of the product may occur.

PRECAUTIONS

Keep Out of Reach of Children. Avoid contact with skin and wash immediately should this occur with soap and water. In case of eye contact, wash thoroughly with water. If irritation persists, contact a physician immediately.

NOTICE TO BUYER: This product is intended for professionals. Users must exercise all due caution and judgment when applying the product under their particular growing conditions. Limitation of liability and warranty: Geponics Corp and/or any other seller warrants only that this product conforms to the description on the product label. No other warranties, expressed or implied, as to merchantability for particular use, or otherwise shall apply. Purchaser's exclusive remedy for loss or damage related to this product shall be the refund of the purchase price only. By using this product, you are deemed to have accepted the terms of this notice.

WARNING

This product will stain many substrates including but not limited to: Plants, rocks, stepping stones, sidewalks, pavers and driveways. Areas which may unintentionally be colored should be pre-wet and then thoroughly rinsed with water immediately following treatments. **Do not apply undiluted product.**
