

UTILIS PHOS ^K

0-48-31-B-Fe

GUARANTEED ANALYSIS

Available Phosphate (P ₂ O ₅)	48.0%
Soluble Potash (K ₂ O)	31.0%
Boron (B)	0.70%
Iron (Fe)	0.05%

Derived from monopotassium phosphate, boric acid and iron sulfate.

DRY WATER SOLUBLE FERTILIZER

Benefits of use:

- Low pH neutralizes the “tying up” effect of phosphate introduced into calcareous soils.
- Soluble formulation that won’t clog drip sprinkler systems.
- Synergistic effect of combining Furst-Class technology and a low pH phosphate fertilizer.

Synergy:

Two or more agents that produce a greater effect when combined than the sum of their separate effects. Phosphate fertilizer is best utilized by plants when acidic and Furst-Class Concentrate has been proven to increase the ability of plants to utilize nutrients. Utilis Phos K is the result of these two energies working together to help plants receive an available 4.5 pH phosphate and enhanced plant function to achieve desired health and yield potential.

Rates:

Consult your Fertilzona salesmen. Optimum rates may vary from crop to crop. Typical rates on alfalfa: 7-10 gal/AC on each cutting.

Provided rates for guidance only. Calibration of spreader at each usage is recommended. Contact your Fertilzona sales representative for further rates and settings. Fertilzona is the manufacturer of Furst Technology. Always read and follow label directions.
