

PHAIRWAY[®]

WATER TREATMENT AMENDMENT

pHairway is an excellent choice
for irrigation water treatment.

It reduces bicarbonates to avoid
alkalinity, poor soil structure and

low fertility. **pHairway** also
increases water use efficiency

as a result of better infiltration
through the growing season,

i.e., fewer, deeper, and more
thorough irrigations. It also

solubilizes micronutrients that
are unavailable due to high

soil pH, making them available
to your turf.

DOT Proper shipping name / technical name:

**Corrosive liquid, N.O.S.
(Monocarbamide dihydrogensulfate)**

Hazard Class or Division: 8; ID# UN1760; Packing Group: III

Note: DOT corrosive to aluminum. Not regulated if
transported by motor vehicle or railcar in packaging that
will not react dangerously or be degraded by this material
[49 CFR 173.154(d)]
