

## Furst-Class Concentrate Drives Results

Furst-Class Concentrate from Fertizona is a patented combination of amino acids and proteins which activate several beneficial biological and environmental responses in plants. This proprietary nutritional technology is formulated into foliar and drip irrigation fertilizers as an ingredient to increase fertilizer efficiency, yield potential, plant health and quality of produce. The following provides general guidance on formulation and use rate for broccoli, however programs can be customized as needed to best fit crop nutritional needs.

## BROCCOLI BENEFITS

Increased Yield (Boxes/A)

Improved Quality of Produce

Improved Uniformity

Increase in Plant Health

## TWO APPLICATIONS

**SECOND SIDEDRESS** 16 floz Furst-Class Concentrate/acre  
40 DAYS AFTER PLANTING

**THIRD SIDEDRESS** 16 floz Furst-Class Concentrate/acre  
10 DAYS LATER

Furst-Class Concentrate was sidedressed with UN-32 (30 gals./A) as a part of the grower's existing nutrient program.

## THREE APPLICATIONS

**FIRST SIDEDRESS** 8 floz Furst-Class Concentrate/acre  
30 DAYS AFTER PLANTING

**SECOND SIDEDRESS** 8 floz Furst-Class Concentrate/acre  
10 DAYS LATER

**THIRD SIDEDRESS** 8 floz Furst-Class Concentrate/acre  
2 WEEKS LATER

Furst-Class Concentrate was sidedressed twice with UN-32 (30 gals./A) and once with AN-20 (35 gals./A) as a part of the grower's existing nutrient program.
