Yuma Printing Co. (02/21)

GENERAL USE INFORMATION

READ ENTIRE LABEL BEFORE USING THIS PRODUCT

FERTI-SPRAY HI-K provides essential plant nutrients in a water-soluble form for use as a nutritional spray. It is designed to be combined with Fertilzona products, but may be applied alone.

DIRECTIONS FOR USE

CONSULT YOUR LOCAL FERTIZONA REPRESENTATIVE OR OTHER AGRICULTURAL SPECIALIST FOR SPECIFIC CROP RECOMMENDATIONS.

FOR USE AS A NUTRITIONAL SPRAY: Uniformly apply the suggested rates of FERTI-SPRAY HI-K in the following amounts of water per acre.

	DILUTION	FOLIAR RATE	APPLICATION TIMING
FIELD, ROW & VEGETABLE CROPS	By air: 3-20 gal.	1 pt. - 4 qts.	Apply every 2-4 weeks as needed, starting pre-bloom.
	By ground: 5 gal. min.		
TREE & VINE CROPS	By air: 10 gal. min.	1 pt. - 4 qts.	Apply every 2-4 weeks as needed, starting pre-bloom to post harvest.
	By ground dilute: 100-500 gal. By ground concentrate: 25-100 gal.		
IN OIL SPRAYS: Use 1-4 pts. per 100 gal.			
MINIMUM DILUTION RATE: 1 qt. per 3 gal.			

COMPATIBILITY: This product is compatible with most crop protection materials. A compatibility test is recommended when using new combinations. Do not mix with lime or TPTH.

NOTE: FERTI-SPRAY HI-K may leave residue on crops when applied at higher concentrations or at higher useage rates. FERTI-SPRAY HI-K tank mixed with soluble calcium foliar fertilizers may leave a visible residue on crops. Do not apply such combinations within 3-4 weeks of harvest.

SOIL APPLICATIONS: For all crops: 1-4 qts. per acre as needed. Do not apply with phosphate or sulfate fertilizer products. Any previously applied phosphate or sulfate fertilizer should be thoroughly flushed from fertigation equipment prior to application of FERTI-SPRAY HI-K. Apply FERTI-SPRAY HI-K products slowly into fertigation equipment in the early part of the water application.
